Backend Developer, Mobile Application Developer 2016-2018

MotoPeik/MotoFood, Iran

- Designed and developed a wide range of administration panels using MVC.net razor engine including a variety of components with the goal of assisting operators for their daily operations.
- Successfully developed multiple challenging android apps using React Native and native modules, reaching more than 1 million food and package deliveries a year.
- The apps used constant location updates for the server. Also, employed an innovative way of playing new delivery services to the driver, allowing them to accept/decline delivery requests merely using their hands-free buttons increasing response rate by more than 25%.
- Developed 5 Mobile apps and 2 administration panels over a 2-year timeline.

Tools & Technologies:MVC,Nodejs, React Native, JavaScript, AJAX, HTML, LESS, WebSockets, Axios, Native Modules, Redux, GPS Services

Full-Stack Designer software engineer 2014-2016

Fatehtours, Esfahan, Iran

- Designed, developed and maintained administration panels including various types of forms and components.
- Reduced both user and work load Immensely by more than 99% making an automated input service developed for passengers' information web form data entry for visa application procedure.

Technologies: MVC.net Razor, AJAX, C# WinForms, LESS, Html
